

November newsletter- Witty Woodchucks.

Here we are again, another year winding down to a close!

November was full of activities for us here in the Woodchuck's class. Of course one of the most exciting things is the change of colours in nature that happens during the autumn season. We talked about, collected and decorated in all the fall colours.

We also had many **VIK**'s this month. **Helena, Szonja, and Marci** all brought in loads of pictures, toys and books for us to look at and play with- and some treats to eat as well! Please feel free to look at the VIK posters we have put up at the back of the classroom on the sliding glass doors.

In **Phonics** and other **academia** this month we learned the letters and sounds for: D, G, O, U, L, F, and B! We are really happy with all the progress the kids have made. The children also seem happy to sing the phonics songs and relate things in playtime to the lessons they learn. Very impressive!!!

In **Math** we have been focusing on recognizing various shapes and distinguishing them from each other, and recognizing them in abstract contexts as well.

We also celebrated American Thanksgiving. The Witty Woodchucks enjoyed a large lunch with the whole school in one room. There was also a huge sing along about food and thanks- and lots of funny songs too.

The Wity Woodchucks also built a turkey. We made it out of paper mache and balloons and toilet paper rolls. We were going to make a piñata out of it, but we decided not to destroy the turkey because we liked the way it turned out too much. I personally think that was a good idea. Please see the attached photos.

So parents, here comes *December* and that means lots more celebrating and lots more fun!!!!

We are looking forward to the Christmas performance we will do for you.

Have a nice December!
